

CALM Workshop

General Overview

Program will consist of two four-hour sessions focusing on the theoretical framework, process and content of CALM and its application. This will include discussion of the application of the CALM domains and concepts of attachment security, mentalization and double awareness and the utilization of psychometric measures in CALM clinical care and research.

Objectives

- Provide an overview of the theoretical foundations of CALM.
- Introduce the CALM structure and therapeutic processes.
- Explore the clinical application of CALM through video-recorded interviews sessions and discuss the concepts of mentalization, attachment security and double awareness
