Synopsis

This presentation will discuss how panelists have incorporated EDIA into their work in developing/creating/revising IP competency frameworks. Panelist will address the following questions:

- How can EDIA be incorporated into the IP competencies? Should there be a separate competency that addresses EDIA within IP teams?
- How has your organization considered equity, diversity, inclusion, and anti-racism in the development of your competencies?
- How have people with diverse identities been included/consulted with in the development of your competencies?
- If people holding various identities have not been included, are there strategies that might be employed that could make the process more inclusive, diverse, equitable?

Learning Objectives

1. Describe four different approaches to framework development and competencies
2. Compare similarities and differences across four existing frameworks from around the world
3. Articulate the added value of collaboration-specific frameworks to other competency frameworks
