

Leadership Bootcamp: Elevating Communication, Trust, and Team Culture – Collaboration and Connection in Action!**Friday, October 3, 2025 | 8:30 am – 12:00 pm***Presented by Jaime Mann***Registration Fees Apply, Limited Seats Available***What if your next leadership workshop was actually about... you?**

We're building a custom Leadership Bootcamp for this year's conference—and you get to shape it. Take the poll below to tell us what you want to learn, fix, or strengthen—and we'll design the workshop around your real-world needs. **It's leadership training with your name on it. Don't miss your chance to shape the session!**

Poll: <https://www.surveymonkey.com/r/LJ9H2VR>

This Leadership workshop is designed for the new and experienced leader in clinical and non-clinical settings. Inspired by this year's AGM Keynote Address, *Steady in the Storm: Building Resilience and Civility at Work*, **Jaime Mann** will guide you through a tailor-made session to help you develop and perfect your team communication and management skills. Ensuring that important discussions are included, participants will be polled in advance of the date to identify the most powerful scenarios to incorporate. Join us for this half-day primer to help you build a more engaged, trusting, and civil team dynamic.

Key focus areas include:

- Effective Communication Best Practices
- Building Trust
- Personal Resilience and Growth
- Collaboration and Accountability
- Real Civility and Respect in Teams

Whether you're stepping into a team leadership role or looking to reinvigorate your leadership approach, this workshop will leave you with actionable insights and tools. Join us to build stronger connections, healthier teams, and lasting results.

Pre-Conference Bootcamps

MSK Bootcamp: Approach to Ultrasound Assessment of the Shoulder, Wrist and Hand, Knee and Ankle

Friday, October 3, 2025 | 8:30 am – 12:00 pm

Presented by Dr. Linda Probyn

**Registration Fees Apply, Limited Seats Available*

Brought to you by **CCE Medical/Samsung**, this workshop includes hands-on demonstration of US exam approach for the assessment of the joint and soft tissue structures, including dynamic assessment to assist in diagnostic assessment. Assessment of the shoulder, wrist and hand, knee and ankle are common MSK ultrasound requests. It is important to have an approach when performing the ultrasound examination for proper diagnosis and to avoid pitfalls. Understanding how to perform dynamic maneuvers will assist in diagnostic accuracy.

Learning Objectives:

At the end of the session, participants will improve their approach to ultrasound assessment of the shoulder, wrist and hand, knee and ankle, and diagnosis of common pathologic conditions.

1. Review anatomy and ultrasound imaging techniques for evaluation of the shoulder, wrist and hand, knee and ankle.
2. Describe useful imaging techniques to enhance assessment.
3. Discuss ultrasound imaging of common pathologic musculoskeletal that are commonly encountered in daily activities.
